Procedures Used in Compiling the Index

Subject words and phrases have been selected as index terms, on the basis of what appears to be the current common usage in the literature itself.

Multiple listings of subjects have been preferred to the use of cross-references.

Subject words and phrases, whether person, place, or thing, have been indicated by use of all capital letters.

Titles of all media reviewed, abstracted, annotated, or discussed have been indicated by use of italics.

Exact titles of all articles and regular features of *School Media Quarterly* have been indicated by use of quotation marks.

An *r* in parentheses following a page reference indicates that a medium by that person, of that title, or about that subject has been reviewed on those pages.

An *a* in parentheses following a page reference indicates that a medium by that person, of that title, or about that subject has been annotated on those pages.

An *ab* in parentheses following a page reference indicates that a medium by that person, of that title, or about that subject has been abstracted on those pages.

Corporate names have been indexed under the common form of the name as it normally appears in print (not in inverted form). Acronyms and initialisms are recorded as such, and they are filed as words.

"Government Publications" have been indexed under subject only.
